

# SUPPLEMENTS THAT ARE IN A LEAGUE OF THEIR OWN

After reviewing nearly every vitamin and supplement company's products, we do not feel that there is another supplement, vitamin, or nutritional company that even comes close to matching our products.

These supplements are unlike any other products on the planet. I believe these products are the only products in the world that match ideal cell resonance, which is one of the reasons that this is nutrition that really, really works.

When you look at these products, versus any other products made. You immediately find out on so many levels, these products are head and shoulders above the others. It is this superior world-class effort in every single phase that is why we believe these products are the most effective, the most bioavailable, the most safe, and promote the most rapid shift in health; which is why we say that this is the most effective nutrition and nutrition that really, really works!

We want you to have that same understanding of just why we feel these products are so much more superior to any other product out there. Here is a synopsis of some of the things that make these products unlike any other products in the world.

- **Absolutely no toxic excipients** -- our products are 100% nontoxic, and excipient free. This immediately makes us different than practically every single product out there. Excipients are Binders, fillers, and "glues" that are typically non-nutritive substances in nutritional products. These substances usually test toxic, we believe it is unnecessary to take nutritional products which have questionable, potentially toxic, non-nutritive excipients. Many of these substances can induce cell death, such as magnesium stearate (stearic acid), or can cause cancer, such as methyl paraben, or are toxic poisons such as sodium benzoate.
- **Never fumigated, irradiated, or contain pesticides/insecticides** -- our products are beyond organic. Every single batch is checked using newly developed photoluminescence equipment, which is able to detect irradiation and contaminants to assure they are free of these toxins.
- **We use only grade 10 herbs** -- we have been told that we are the only company in the United States using grade 10 herbs (which are the very best). The difference in an herbs mineral content may vary by 900%, depending on the growing and harvesting methods. Likewise, an herbs nutrient content can range from being very potent with spectacular healing properties to virtually inactive. We utilize only grade 10 herbs for their spectacular healing properties. This makes a HUGE difference!
- **We use only 100% whole food, living source vitamins** -- this is not the same as those vitamins that say "All Natural." or "Vegetarian". These are usually terms referring to the fact, that they are not made from animals, but are still isolated vitamins, created in a lab, and not from a whole food living source. An example of this would be vitamin B1 (Thiamin) – Most Thiamin in vitamin supplements comes in the form of Thiamin Hydrochloride (HCL) or Thiamin Mononitrate - neither of these substances are naturally found in food or in the body! The predominant form of vitamin B1 found in the body is Thiamin Pyrophosphate (Cocarboxylase). This natural form is far more absorbable, which is why we only recommend and use live source vitamins from a food source and not "fake" vitamins. This can also be seen with Vitamin C, for vitamin C is not the same as ascorbic acid. For although scurvy is a lack of Vitamin C; no amount of ascorbic acid can "cure" scurvy, yet a slice of Lime with all the other nutrients that make up the Vitamin C complex can.
- **From growing, harvesting, production and even shipping; everything we do is superior** – Even our bottling, we use patented violite bottles, which block the rays between 420nm and 750nm, which are the ranges that are known to damage nutrients. Also, we have developed a special nitrogen flushing process, which results in 1-2% oxygen in the bottle instead of the typical 5 to 10% - resulting in the freshest product possible. Also, we only ship by UPS, since they are the only company who will guarantee not to irradiate the product.

**We take supplements and quality to the extreme, to offer you the most potent, most effective supplements possible! We believe there are no other products in the world like these. These are extremely powerful players that can change the whole game; which is why we say they are the most effective, and really work, thereby providing the most rapid shift in health!**
